

SEO KEYWORD RESEARCH & AUDIT CASE STUDY

Comprehensive Search Engine Optimization Strategy & Analysis

TARGET BUSINESS:
Grammarly (grammarly.com)

NICHE:
AI Writing & Grammar Assistant

ANALYSIS TYPE:
Keyword Audit & Gap Strategy

1. BUSINESS OVERVIEW

Real Website Analysis

Company Profile & Value Proposition

- **Domain:** Grammarly.com (Freemium SaaS Model).
- **Core Product:** AI powered grammar checking, tone detection, plagiarism scanning, and generative writing assistance.
- **Monetization:** Monthly/Annual Premium & Business subscriptions.
- **Current Organic Status:** Established industry leader with massive organic domain authority (DR 92+).

SEO Objective & Case Study Focus

- **Primary Focus:** Evaluate high intent organic search keywords and identifying growth opportunities in B2B/Enterprise markets.
- **Audit Scope:** On Page optimization assessment, keyword intent categorization, and strategic content recommendations.
- **Disclaimer:** Based on public audit data. Actions are structured as strategic recommendations.

2. TARGET AUDIENCE SEGMENTATION

User Profiling

B2C Users (Students & Professionals)

- **Profile:** Students, freelancers, bloggers, ESL learners.
- **Primary Need:** Instant proofreading, fixing grammar errors, avoiding plagiarism in essays/emails.
- **Search Behavior:** Informational & free tool searches (e.g., "free grammar checker", "how to fix passive voice").

B2B Users (Teams & Enterprise)

- **Profile:** Content teams, HR leads, marketing agencies, CTOs.
- **Primary Need:** Standardizing brand tone, team productivity, secure enterprise AI writing.
- **Search Behavior:** Commercial & transactional queries (e.g., "AI writing tool for enterprise", "Grammarly for business").

3. ON-PAGE SEO OBSERVATIONS (EXISTING SITE ANALYSIS)

Audit Insights

Observation 1: Exceptionally Strong Free Tool Landing Pages (TOFU)

Grammarly dominates top-of-funnel searches by creating dedicated, minimalist landing pages for specific micro-tools (e.g., "Grammar Checker", "Plagiarism Checker", "Citation Generator"). These pages feature simple input boxes with instant value.

Observation 2: Deep Content Hub (Grammarly Blog)

Their blog captures millions of informational queries ("affect vs effect", "how to write a formal email"). Interlinking from these blog posts directly into free browser extension installations is a major conversion driver.

Observation 3: Opportunity Area in B2B Intent Mapping (MOFU/BOFU)

While consumer keywords are heavily dominated, enterprise team collaboration and industry specific writing keywords (e.g., "AI assistant for legal teams", "medical writing grammar check") show headroom for specialized landing pages.

4. 12 TARGET KEYWORD STRATEGY & SEARCH INTENT MAPPING

Keyword Matrix

Target Keyword	Search Intent	Est. Volume	Mapped Target Page	Funnel Stage
free online grammar checker	TRANSACTIONAL	450,000/mo	Grammar Checker Landing Page	Bottom (BOFU)

6. STRATEGIC IMPROVEMENT RECOMMENDATIONS

Actionable Audit

1. Industry Specific B2B Landing Pages Create dedicated solution pages for legal, healthcare, and finance sectors targeting keywords like "HIPAA compliant AI proofreader" to capture enterprise buyers with high purchase intent.	2. Internal Linking Optimization Add dynamic contextual callout boxes inside high traffic informational blog posts (e.g., grammar articles) pointing directly to the B2B team plan landing pages rather than only the free browser extension.
